

WHY CREATURE COMFORT PET THERAPY

TESTING PROCESS

- Obedience & Temperament
- Medical Equipment
- Testing with Crowds
- All Types of People
- Recertification

We test our therapy animals on obedience, temperament, sensitivity to medical equipment and with a variety of people, including children. Our teams are re-tested every two years to ensure the animal is still fit for visiting as they mature.

SCHEDULING VISITS

- Flexible
- Variety of Visits
- Online Signup

Our online dynamic calendar allows therapy teams to pick from a wide variety of visits based on location and schedule. We take care of the details, so teams will never need to contact facilities directly to schedule visits.

ONGOING SUPPORT & EDUCATION

- Staff Support
- Personalized Guidance
- Team Education
- Ongoing Training
- Mentoring

Our staff is dedicated to supporting our teams. Therapy teams receive training on confidentiality, visit etiquette, handling difficult scenarios, effective communication techniques, and other specialized topics. Every certified team is assigned a mentor.

FACILITY RELATIONSHIP

- Visit Planning
- Staff Support
- Visit Management

To provide the most effective experience for our teams and facilities, we communicate with each location to customize the visit before our teams walk through the door. Our partner facilities can count on us to be available and effectual.

COMMUNITY

- Team Camaraderie
- Dual or Solo Visits
- Team Events

When teams join Creature Comfort they join a community. We offer many visits with other teams. Every quarter, we hold team gatherings and events. Our teams communicate with each other in our private online forum.

GUIDELINES

- All Breeds Welcome
- Unaltered Allowed
- Titers Accepted
- No Food Restrictions

We have no breed restrictions, allow unaltered dogs and include other companion animals (cats, rabbits, ferrets) in our organization. We accept titers, and we believe each owner should feed their therapy animal whatever is most beneficial for them.
